

CLAIMS

1. A pair of swimming goggles comprising:
 - an eye cup portion for protecting eyes of a user;
 - a belt which is connected to the eye cup portion; and
 - a connecting/disconnecting mechanism provided on the belt, the connecting/disconnecting mechanism being used when the user puts the goggles on and off his/her head
2. The pair of swimming goggles according to claim 1, wherein a back portion of the belt which fits to the user's occipital region is made wider and side portions of the belt which fit to the user's temporal region are made narrower.
3. The pair of swimming goggles according to one of claims 1 and 2, wherein the belt has a hard portion and a soft portion, and a connected area of the belt with the eye cup portion is formed with the hard portion.
4. The pair of swimming goggles according to one of claims 1 and 2, wherein the eye cup portion is provided with projections or holes on its both sides, and the belt is provided with holes or projections corresponding to the projections or the holes of the eye cup portion so that the belt and the eye cup portion are connected together by inserting the projections or the holes of the eye cup portion into the corresponding holes or projections of the belt.
5. The pair of swimming goggles according to claim 3, wherein the eye cup portion is provided with projections or holes on its both sides, and the belt is provided with holes or projections corresponding to the projections or the holes of the eye cup portion so that the belt and the eye cup

portion are connected together by inserting the projections or the holes of the eye cup portion into the corresponding holes or projections of the belt.

6. The pair of swimming goggles according to claim 3, wherein the eye cup portion is provided with projections on its both sides, and the hard portion of the belt is provided with holes corresponding to the projections so that the belt and the eye cup portion are connected together by inserting the projections of the eye cup portion into the holes of the belt.

7. The pair of swimming goggles according to claim 4, wherein the eye cup portion is provided with projections on its both sides, and the hard portion of the belt is provided with holes corresponding to the projections so that the belt and the eye cup portion are connected together by inserting the projections of the eye cup portion into the holes of the belt.

8. The pair of swimming goggles according to claim 5, wherein the eye cup portion is provided with projections on its both sides, and the hard portion of the belt is provided with holes corresponding to the projections so that the belt and the eye cup portion are connected together by inserting the projections of the eye cup portion into the holes of the belt.

9. A belt for a pair of swimming goggles comprising an connecting/disconnecting mechanism, wherein the belt is connected to an eye cup portion of the swimming goggles which protects a user's eyes, and the connecting/disconnecting mechanism is used when the user puts the goggles on and off his/her head.
